Checkpoint 4 Sprint D 16-12-2021

Did pretty well this sprint.

Did his tasks quickly and helped out the team

Does fast and great work. Very reliable.

Finished his tasks really fast and then helped others where needed.

Contributed the most this sprint and did it on time.

Checkpoint 3 Sprint C 02-12-2021

Did what i had to. Implemented all my tasks and tried to help the others with theirs.

Helpful and does even the extra work when needed.

Did a lot of work and took over some tasks from other people when we started falling behind in the end of the sprint.

Overall good contribution, but could have done more probably.

Did a lot of work but doesnt communicate enough

Checkpoint 2
Sprint B
05-11-2021

Doing all that I can. Implementing everything that can be useful in our current unfinished version of the app.

Does a lot of work and research. Did great work on the API usage.

Definitely giving good feedback during meetings and coming up with new idea's and input. put in his part of the work for sure.

Contributed to the Google API part of the sprint a lot and did his part of the work

Worked on the back-end (api-research and implementation) and research on a database-choice. Overall good effort, but there was still room for more work to be done.

Checkpoint 1
Sprint A
03-10-2021

Doing pretty good. Working with a good pace.

Does a lot of work, and very helpful. Would often times guide the discussion during meetings.

Also worked a lot on the front end, put a lot of time into this sprint and definetelly helped to make sure we had a end result to put down

Procrastinated, but delivered good results

Dobri contributed a good amount to the first sprint of our project. He did all of the styling/desing for our front-end applicatiot, he did the CI on gitlab and also did a part of the documentation.
